

# KZ-B30 (micro SIM to SIM Card Extender)

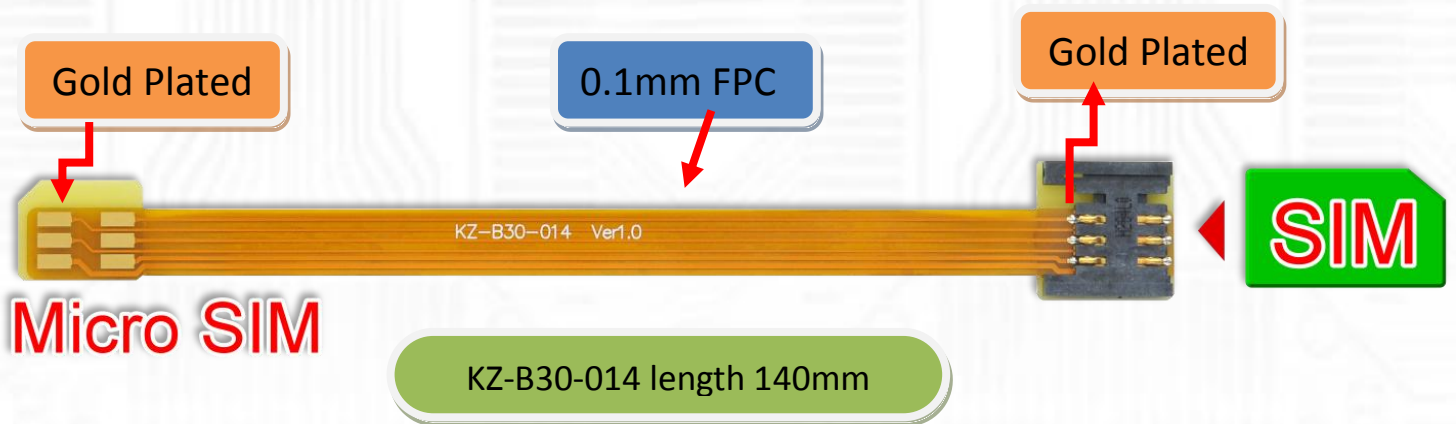

## Introduction:

KZ-B30V1.1 Micro SIMcard Extender is a debug and test tool especially for SAMSUNG Galaxy, etc. Design the FPC cable for flexible use.

It allows a Micro SIM Card to be extended from the host slot for SIM interface. As thickness of FPC is 0.1mm, KZ-B30 can be routed through narrow slit between body and cover case.

It's especially designed to save valuable labor and time in the production environment. The SIM extender is designed to minimize the signal degradation effects of the extender by proven design techniques.

It's also a powerful tool for engineers, or use for mobile phone SIM test protection.

As a New manufacturer of quality computer connectivity products since 2009/Mar, BPLUS technology brings to market a broad range of upgrade products. These products bridge the connection between Desktop/Notebook systems and external peripherals.
